

#### **Joint Solution**

# Security and compliance for Microsoft Azure Virtual Desktop

Securing virtual desktop environments can be a challenge for organizations that need to adhere to strict compliance requirements. With end users connecting to more applications and more clouds through more devices, security teams are concerned that just one insecure connection or misconfigured device can expose highly sensitive information to an unauthorized user or, worse, a nation state bad actor.

### Corelight for Microsoft Azure Virtual Desktop and Office 365

With Corelight data in Microsoft Sentinel, users can visualize the relationship between source IP and URI for HTTP connections with errors.

#### Helping maintain security and compliance with Corelight NDR

Corelight and Microsoft have teamed to design a solution to help compliance-centric organizations deploy and maintain a centralized, affordable, and highly secure virtual desktop environment. Building on its native integration with Microsoft Sentinel and Defender security platforms, Corelight's rich network telemetry and analysis is unique in its ability to help ensure Microsoft Azure Virtual Desktop (AVD) and Office 365 environments remain secure. This is especially true for government agencies and organizations that have stringent compliance requirements.

## Supporting Microsoft Azure compliance framework

Jointly developed to help Azure cloud customers secure their Microsoft AVD and Office 365 environments, Corelight for Microsoft AVD is essential for supporting Microsoft's mission for making Azure a fully compliant cloud platform. Highly regulated customers in industry and government can now meet a growing list of security frameworks and required standards, such as CMMC, DoDCAR, .govCAR, NIST 800-171, OMB M-21.31, and others.

#### Key benefits include

- Advanced network telemetry and analytics for Microsoft AVD environments
- Native integration with Microsoft Sentinel and Defender security platforms
- · Fully compliant for U.S. Federal government deployments
- Corelight App for Microsoft Sentinel ingests pre-formatted Corelight data directly into Sentinel dashboards and data lakes
- Critical component of Microsoft Zero Trust Architecture (ZTA)

#### Joint Solution: Corelight and Microsoft Azure Virtual Desktop

Microsoft enables digital transformation for the era of an intelligent cloud and an intelligent edge. Its mission is to empower every person and every organization on the planet to achieve more.

Corelight provides security teams with network evidence so they can protect the world's most critical organizations and companies. On-prem and in the cloud, our open Network Detection and Response platform enhances visibility and analytics, leading to faster investigations and expanded threat hunting. Corelight's global customers include Fortune 500 companies, major government agencies, and large research universities. Based in San Francisco, Corelight is an open-core security company founded by the creators of Zeek®, the widely-used network security technology.
